I got the phone from a girl in Busby who found the calendar item and contacted law enforcement. I've tried to backtrack on the chain of ownership to figure out who had it when the calendar item was created, but have not been successful. I also tried to identify the owner via forensic review, but was again unsuccessful.

All of my documentation on this has been turned over to the USAO.

Lori,
Thank you for the response. Can you tell us how the phone came into the possession of the government?

The FBI does have a cell phone and has been investigating ownership of the phone. Unless I am unaware of recent developments, we have not linked the phone to Judaya Threefingers. Aaron will obviously correct me if I'm wrong.

Lori,

We just learned that the government has a cell phone belonging to Ms. Three Fingers which purportedly contains messages concerning this case. We respectfully request that we be given discovery concerning that, particularly the content of the messages.

Thank you.
